

Axel Schulte is professor of Aircraft Dynamics and Flight Guidance, head of the Institute of Flight Systems, and dean of the department of Aerospace Engineering at the Bundeswehr University Munich. In 2010 he was visiting professor at the Humans and Automation Lab at MIT. Prof. Schulte has a background in aerospace engineering, served as technical officer in the German Air Force, and has industry experience as systems engineer and project manager. His research interests are in cognitive ergonomics and human-autonomy teaming since more than 25 years. His team of researchers develops adaptive associate systems and intelligent mission management systems for aerial manned-unmanned teaming applications, fast jet aircraft and helicopters.
